Subject: SBA List will score in favor of Lee Amendment #1891
Date: Tuesday, May 25, 2021 4:35:18 PM

Good afternoon,

Susan B. Anthony List supports and will score in favor of the Lee Amendment #1891, which, if enacted, would make it clear that the funds in the United States Innovation and Competition Act of 2021 (formerly the Endless Frontier Act) are not used to support anti-life research that endangers unborn lives. This amendment would codify existing guidelines preventing authorized funds from being used for embryo-destructive research and prohibit this administration's policy of funding research using human fetal tissue derived from abortion.

The Lee Amendment would stop federal funding for research (1) using fetal tissue derived from an abortion, (2) creating, destroying, discarding, or putting at risk a human embryo, (3) creating human embryo-like entities, (4) intentionally creating heritable genetic modifications in embryos, or (5) using stem cells derived from the prohibited research.

We are grateful to Senator Lee for his commitment to ethical research and good science, and urge you to vote in favor of the Lee Amendment #1891.

SBA List does not take a position on the underlying bill, but will score in favor of this amendment.

For life!

Jamie Dangers

Legislative Director, Susan B. Anthony List
